Truck Weighing Indicator, Type R5230
With microprocessor

- For exact indication of weight (trucks)
- > Available for industrial applications,
    Resolution up to 100.000 divisions;
  > OIML 6.000 d trade version on request
- > Unit in metal housing, for panel mount;
  > Stainless steel housing IP 65 and
    table stand available on request
- 20 mm LCD-digits with LED backlight
- Front panel with keyboard for comfortable
  navigation through menu & for controls
- Multiple weighings available for split-
  weighing or axle weighing
- Mutliple first weigh storage & stored tares
- Totals for truck, product & destination
- With internal real time clock & calendar
- Input for max. 12 load cells, each 350 Ω;
  Input signals: 0.1 mV/V to 3.0 mV/V
- Serial Interfaces RS 232 & RS 485
- Power Supply: 12 to 24 V DC, 10 VA
                 or 86 to 260 V AC, 48 to 62 Hz, 10 VA
- Operating Temperature: -10 °C to +50 °C

  Options: > 4 x open collector outputs & 4 x inputs (extra card)
            > -10 to 10 V or 4-20 mA opto-isolated analog output
            > mounting set for panel mount
