

544-e

Main Controller, Type MC-XS

With micro processor

- For Multi-Scales-Systems
- With central controlling and indication of connected *Büttner-Weighing and/or Dosing-Electronics* (e. g. MLC 96, WLC 2, GPE 1352)
- With central adjusting possibility for connected electronics
- Clear visualisation of actual Weighing and/or Dosing conditions (Status Information, Actual Weight, Component No., etc.) in two 2-line LCD-Displays (each with 20 digits per line, digit height approx. 8 mm)
- Easy data input with 20-key Foil Keyboard
- Interfaces:
 - * Bus-Interface for Weighing and/or Dosing Electronics via RS 485;
 - * Serial Interface RS 232 (for PC or printer)
- Comfortable Printouts possible
- In connection with Multi-Components-Dosing-Controllers WLC 2 with memory store for up to 99 formulae
